My best accomplishments: I have been able to start several businesses and purchased the equipment I needed for each. I opened and operated all of them despite my learning disabilities. As things came up I would diversify and change each business as needed to keep them going. This allowed me to help my extended family.

My best Attributes: When a person needed a place to live I would go out of my way to find them a place. I've taken broken down cars and fixed them back up to make them safe. I gave them to people in need or worked out some kind of trade with them, so they would be able to take their families to appointments or to work and back. I've always been the type of man who breaks down bad situations and try's to figure out how to fix them. For the most part I have been a good problem solver. For all of my crimes and sins with my daughters I didn't use any logic or problem solving skills that I should have. Due to that fact it has been so very devastating to my family and myself.

I am most proud of my family: Their abilities to overcome obstacles and to make bad situations better and that they have developed these skills at such a young age. It took me until my late 20's to understand that. I enjoy that they are using their brains and thinking outside the box. I have been able to help them reach their potential whether it be computer programming with my son, August, building and assembling things with my daughter, Riley,
or cooking, baking, and listening to others peoples problems
with my daughter Lydias.
My kids go out of thier way to help thier friends get
back on the right track. Where I lived in Albion, if
someone needed help with everyday problems or needs the
people in town would direct them to me. Even the
police come to me to help find people they were looking
for. That includes a suspected murderer. I have tried
for years to help every one who asks.
Most of everything I have helped people with I did
not recieve money for. My childrens needs were always met
by me or by someone I've helped through bartering. I
have an issue with asking for help and that is one
reason I've failed.
My prayer for my children is that they can over come
the obstacles placed before them by thier mother and
I, I do not wish the sins committed I
have comitted to be visited on my kids; or thier
children.
My short term goals: I will seek out the help I
need to start to repair the damage I have done to my
kids; my family and myself. I will make sure that they
get the counseling they need. I need to figure
out why my thought process broke down and get it
mended. I will take any help that I can get to make
this happen.
I am going to get a plan together on how I can repair the bridges I've destroyed with my family and friends and coworkers. I've been writing letters to my family and friends asking for forgiveness, but I have no idea if they have even read them. I've not received any word from them. At this point, I don't have any idea if any of them are willing to speak with me or if they are willing to allow me the chance to make amends. For the past seven months I've been sending letters and cards but still have no answer. I will keep trying.

My long term goals: I would like to get my G.E.D. and take vocational courses to get an electrician's license, plumber's license, mechanics license and a mechanical license. I would also like to take a speaking course so I can speak out about my crime and make people more aware of the damage it does. This affects families and entire communities in such a negative way. I want my story to be told if it will help. Maybe at that point I will be able to try and repair the damage I've done.

I would also like to marry my long term common law wife Nicole R Jacob who, as of Aug 15, 2016, I've been with for 14 years.

Leniency for me is tied to God's word. I understand that I have already been forgiven by God but I also know I broke the law and have to answer for my guilt.
I knew I don’t have any right to mercy from
the court, but my hope is that if I receive mercy
I will be able to heal and demonstrate to the
world God’s grace. I understand my fate is in your
hands and I will trust that your decision will be
God’s also.

Since I have been locked up I have become
close to God and he has become my personal savior.
I have been working on bible studies with Pastor
Rocky and Forgotten man ministries. I have finished
the first course and am ever half way completed with
the second course. The other Pastor I’ve been
working with is Pastor Ken Lyon for Bible correspondence
Fellowship. I have completed 3 courses and am ever
half done with the forth course. I have been
dealing with a third pastor Ronald Fleming who is
in here with me on a 30 day sentence. He has been
working with me, showing me how I am a child of God
and how I can change and help others change.

Due to my learning disabilities I’ve been struggling
to understand what I am studying. When Pastor Ron was
placed in our cell and began helping me I saw God’s
grace for me.

I am going to take an advanced bible course to see
if I could be a pastor. Pastor Ken and Pastor Ken
say I have what it takes to be a leader and to draw
people to God. All three pastors say I have a knack
for the word of God and he has clearly placed this in my heart. They all would like to see me succeed in the church.

The public will be protected because I will be open about my story through Christ. I will speak at crisis centers and public events and any where God gives me a voice. By making other people aware of how I failed I hope to help others like me who have fallen into the same sin.

I would like all the educational training I can get. I would like help ever coming my learning disabilities which includes dyslexia, reading comprehension problems, and ADHD.

Do to my hard lifestyle and poor choices I wrecked my body, I need a lot of medical services. They include;

reoccurring polyps in my throat and on my vocal cords

The discs in my back are bulging and deteriorating

degenerative arthritis

degenerative bone disease

High blood pressure

Acid Reflux disease

Muscle spasms

C.O.P.D. Asthma, Emplazima

restless leg syndrome

hearing loss both ears

mood swings

The acid reflux is destroying my teeth

Bad eye site
